

Company Background:

Blue Stone International, LLC, is a global financial consulting firm that develops modeling tools used to evaluate Strategic Planning, Mergers, Acquisitions and Divestitures, Treasury Management, Corporate Banking, and Real Estate Finance initiatives. In addition, Blue Stone offers consulting services, utilizing the capabilities of these models, to help client companies increase shareholder value.

Position Available: Financial Analyst

Job Responsibilities:

- Analyze and interpret the client's existing modeling environments
- Identify business drivers and develop model forecast logic
- Design financial account structures, reports, and consolidations
- Develop and lead training courses and other educational programs
- Document and transform existing organizational processes
- Assist in specific client analysis and other ad-hoc client requests
- Recommend best practices related to forecast modeling and long-range planning

Position Requirements:

- Finance or Accounting degree from accredited university – min. 3.2/4.0 GPA
- Understanding of the following concepts: Cash Flow Forecasting, Discounted Cash Flow Valuation, Consolidation Accounting, Mergers and Acquisitions, Divestitures, Capital Structure and Key Performance Indicators.

Locations: Headquarters in Chicago and London with satellite offices in Houston, San Diego, Boston, and New York.

Travel: Extensive travel (domestic and international) is required. Depending on client engagement, travel could be up to 75%, but is typically around 30%. Relocation and rotational programs are also available.

Special Skills:

- Working knowledge of Oracle/Hyperion Products (Essbase, Planning, HFM, Crystal Ball)
- Effective presentation skills. Expect to present to senior level clients within 6 months of start date.
- Foreign language skills a plus.
